UNIVERSAL DESIGN FOR LEARNING

Brooke Hessler, Director of Learning Resources

Bobby White, Instructional Designer, Libraries

California College of the Arts

UDL in a Nutshell

UDL in a Nutshell

INSPIRED BY INCLUSIVE DESIGN MOVEMENT

Researchers at the Center for Applied Special Technology (CAST) pioneered UDL in 1984 as an educational design intervention.

**MANY CAMPUSES ADOPT
UDL BECAUSE
ACCESS IS A LEGAL
OBLIGATION**

UDL in a Nutshell - Federal definition

HIGHER EDUCATION OPPORTUNITY ACT OF 2008

“UNIVERSAL DESIGN FOR LEARNING is a scientifically valid framework for guiding educational practice that

(A) provides flexibility in the ways information is presented, in the ways students respond or demonstrate knowledge and skills, and in the ways students are engaged; and

(B) reduces barriers in instruction, provides appropriate accommodations, supports, and challenges, and maintains high achievement expectations for all students, including students with disabilities **and students who are limited English proficient.**”

UDL in a Nutshell - Federal definition

HIGHER EDUCATION OPPORTUNITY ACT OF 2008

“UNIVERSAL DESIGN FOR LEARNING is a scientifically valid framework for guiding educational practice that

(A) provides flexibility in the ways information is presented, in the ways students respond or demonstrate knowledge and skills, and in the ways students are engaged; and

(B) reduces barriers in instruction, provides appropriate accommodations, supports, and challenges, and maintains high achievement expectations for all students, including students with disabilities **and students who are limited English proficient.**”

YES! UDL is a great way to make your class more accessible to multilingual students

. . . AND multilingual students have as diverse learning needs as everyone else.

Why UDL?

BECAUSE **EVERYONE** LEARNS DIFFERENTLY

Keeping UDL in mind makes your course more accessible for **all kinds of learners**--and helps you become a more versatile educator.

UDL reminds you to communicate your course content more clearly.

UDL methods give students more ways to demonstrate and communicate their knowledge & creative vision.

3 PRINCIPLES

Recognition Networks

Provide **multiple means of representation** to give students various ways of acquiring, processing, and integrating information and knowledge.

Strategic Networks

Provide **multiple means of action and expression** to provide students with options for navigating and demonstrating learning.

Affective Networks

Provide **multiple means of engagement** to tap individual learners' interests, challenge them appropriately, and motivate them to learn.

MOST OF US ALREADY DO SOME OF THIS

Most CCA instructors already integrate visuals and other media into their courses.

Our aim is to help instructors take the next step:

shifting from already-good teaching to UDL-informed teaching

that **intentionally** integrates the 3 key elements.

Reflecting on week 8: commodified
and preparing for week 9: constructing membership
<https://www.google.com/fipa.edu/ibordel/ortigue/112>

Dear Students,

Another great week! We discussed **Sontag's** introduction to a book of posters from the **Cuban Revolution**, and her argument as it arose from the history of posters, to their use in the Revolution, to the new meaning the posters take on when **re-contextualized**, and in her assessment tacitly computed and **co-opted** in their **commodification** as a coffee table book. Below are key terms we discussed.

Thank you Raq for helping us open the word **quixotic!** I think this word may come in handy for some of you, given the current climate of optimism and speculation in the face of political crisis and natural disaster. It means someone or something that is both **visionary, unrealistic, and impractical**. It refers to a story written in 1605 by Cervantes about Don Quixote, a man who yearns to be a chivalrous knight like those he has read about, and to rescue and win a damsel named Dulcinea. To this end he sets out to slay dragons, which are actually windmills. The magic of the story is the earnestness of his heart, despite a disconnect with reality, and the ability for both characters and readers to **invest** in a false but beautiful project. It's also an important story for its metatheatrical, or story within story and awareness of multiple levels of narrative. Here is Picasso's drawing of Don Quixote and his squire Sancho Panza.

I think we are onto something with both the manifestations and the silent reflections. In each case we are looking for multiple ways to enter, explore, and use the ideas. We will continue to explore these methods. Here are some images from our manifestations of the text:

Class Digest: 12 March 2018 (Monday)

By G---I

THE MAIN THING WE DID TODAY:
We started this amazing Monday morning with a minute of mindfulness. I later on we separate into groups and we had story sharing time it was a nice change from normal class we went to in small groups and we got to know our classmates even better. Some of them share their story with some of them share their letters and we give feedback by using questions like how did you feel by reading this out loud? Did you see something different while reading out loud that you did not see while you were making?

A CONNECTION BETWEEN OUR CLASS AND SOMETHING OUTSIDE OUR CLASS:
It is nice to tell our story or story that we have to share so other people can relate it can be a new connection you may have with new person also share a memory to a person overall story can help you as the listener and you as a reader!

SOME VOCABULARY WORDS FROM TODAY:

- **Provocative:** causing annoyance, anger, or another strong reaction, especially deliberately
- **Vexed:** (about a problem or issue) difficult and much debated; problematic
- **Melancholy:** a feeling of pensive sadness, typically with no obvious cause

A Comparative Analysis of Digital Stories

Behind every turning point in our life, there has a story of making change. Sometimes you decided to make changing, other times you are forced to have change. I am comparing Leah Potts's digital story "Snapshot" with my own digital story "Thank You But it is Time to Leave You" to explore the similar and different of the turning point in our life. Overall, I find family play an important role in both story.

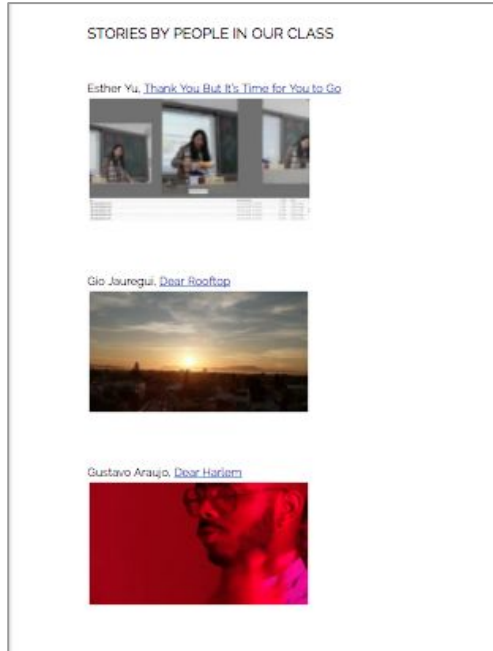

Leah describes her life be changing by an accident, and her mom has been her companion during this experience the process of recure. At the sametime, I shows my story with my camera by focusing on the changing of her relationship with her camera and her attitude to her camera. Our differences are evident from the whole structure of the story. Leah focus on her life after accident while I use half of my story to show my life before I making change.

We choose totally different theme color for our videos. Leah start her story which white and black title on the center, then fade in the photos of hospital hallway. She using white for every transition and also the ending credits while I uses black for background and transition. In both stories, the storyteller use images and videos as tool at the same time. In Leah's story, video starts right after the last sentence of story "because I wanted to remember where I came from". Leah is walking carefully in the video which shows us she already walking again. I use video at the beginning to recreate the scenes to show my relationship with my camera. And also showing

AFTER / DIGITAL STORYTELLING AS REFLECTION & ANALYSIS

Students create digital memoirs then use them as sources for comparative analyses. (Brooke Hessler, WRT2 EL)

So is UDL just

**“ADD ART-MAKING
AND STIR”?**

JUST ADDING ART ≠ UDL

Integrating art/making into an academic class is a wonderfully intuitive way to begin developing a UDL-informed assignment, especially at CCA.

It's something most instructors already do so well!.

The **next step** is to consider what teaching and learning goals can be furthered through that option, how it can become part of a **comprehensive** approach to designing multiple means of representation, demonstration, and engagement into the course--and how to **assess** its effectiveness in multiple ways as well!.

REPRESENTING INFORMATION

IN GENERAL, be explicit about the ways in which students can access content (e.g., textbook, slides, course website, videos), explaining where to find background information. and providing multiple examples in a variety of media.

REPRESENTING INFORMATION

THINGS TO TRY

- Make an alt-text version of a text
- Break content into chunks
- Highlight patterns-relations in a text
- Caption a video
- Screencast a process

DEMONSTRATING KNOWLEDGE

IN GENERAL, use the syllabus to communicate regular routines, establish expectations, outline the timing and format of assessments, and offer resources for the management of information.

DEMONSTRATING KNOWLEDGE

THINGS TO TRY

- Convert a lecture or paper into an audio or video
- Assign a video of a learning experience
- Curate a collection of student work
- Use a discussion board for critique
- Assign a weekly class historian to summarize class-time experiences

UDL in Practice - the WHY of learning

KEEPING STUDENTS ENGAGED

IN GENERAL, outline the learning goals and objectives, the relevance of the content, and any opportunities for choice within the course.

KEEPING STUDENTS ENGAGED

THINGS TO TRY

- Email a welcome message at the start of thematic units
- Offer no-penalty practice to encourage risk-taking
- Integrate personal experiences into analyses
- Assign ongoing self-assessments
- Share coping skills
- Incentivize collaboration
- Make a weekly class digest

Hands-on Demo

IF YOU COULD DO JUST ONE THING . . .

If you're eager for a quick game-changer here it is: **Make your PDFs accessible** by scanning them as OCR-ready. These word-searchable files . . .

Help all students--including multilingual learners:

- read more strategically & build vocabulary
- conduct research more strategically
- use text-to-speech apps

Make your PDFs more accessible

SCANNING

3 handy ways to scan or convert your documents so they are Optical Character Recognition (OCR) ready:

———— GREEN COPY

Take your loose pages, scan there, pay a setup & per-page fee

———— ADOBE SCAN

Mobile app that scans to OCR PDF

———— ADOBE ACROBAT PRO

Converts any image or PDF to OCR

Make your PDFs more accessible

SCANNING

Scan & OCR

MORE TIPS

————— CHECK YOUR LIGHTING

Always scan in bright, but indirect light

————— GET YOUR ADOBE CLOUD ACCESS

Contact HelpDesk@cca.edu

————— LAB COMPUTERS AT CCA

All lab computers at CCA have the Adobe Suite

Diving In: Part 2

PUTTING IT ALL TOGETHER

“LEVEL UP” THIS LEARNING EXPERIENCE:

You’ve decided to screen a 20-minute video in your class to accompany the day’s lecture--a great way to begin diversifying the way information is represented. *What else* can you do to enrich the way this learning experience will provide . . .

- _____ multiple means of **representation**
- _____ multiple means of **action and expression**
- _____ multiple means of **engagement**

Universal Design for Learning Guidelines

PUTTING IT ALL TOGETHER

THINK - PAIR - SHARE

- _____ What are some ways you are already incorporating these principles into your teaching?
- _____ What's one thing you could do to take it to the next level?

UDL@CCA

TODAY'S HANDOUTS
